WHAT IS GUESTFLOW PRO?

A complete digital system for the modern hotel

Built specifically for independent hotels and small hotel chains who want to modernise the guest experience without managing multiple tools.

GuestFlow Pro replaces paper check-in forms, printed city guides, manual review collection, and disconnected marketing lists with a **single branded platform** that works on every guest's phone.

Hotel managers access everything from one dashboard — guest registrations, booking requests, service orders, review scores, and marketing analytics — without switching between different tools or providers.

The entire platform is **white-labelled to your hotel**: your logo, your brand color, your welcome message. Guests never see "GuestFlow" — they see your hotel.

THE OLD WAY

- ✗ Paper registration cards stored in folders
- ✗ Staff manually chasing reviews after checkout
- ✗ Guests asking reception for restaurant tips
- ✗ Marketing lists built by hand from email signups
- ✗ No visibility into upsell revenue or guest trends

WITH GUESTFLOW PRO

- ✓ Guest checks in on phone before arriving
- ✓ Review requests sent automatically post-checkout
- ✓ AI-powered city guide on guest's phone at all times
- ✓ Marketing opt-ins captured at registration
- ✓ Full dashboard with live stats and export tools

TECHNOLOGY STACK

- Next.js 16
- Django 4.2
- PostgreSQL
- REST API
- JWT Auth
- HMAC Webhooks
- Google Places API
- GetYourGuide
- WhatsApp Integration
- Hosted on VPS

MODULE	WHAT IT DOES	WHO USES IT	STATUS

API Keys	Secure external API access for n8n / Zapier	Tech / Developers	LIVE
Checkout + Repeat	Automated checkout flow + re-engagement campaigns	Hotel Manager	COMING SOON

END-TO-END GUEST FLOW

Every step of the guest experience, connected

From the first enquiry to a repeat booking — GuestFlow Pro manages the full journey. 8 of 9 steps are live; checkout and repeat booking are in development.

Step 1 — Booking Request
Guest submits a room enquiry via the hotel's public page. Hotel receives it in the Booking Requests dashboard and confirms or declines with one click. Notes added internally, never shown to the guest.

LIVE

Step 2 — Pre-arrival Check-in Link
Hotel sends a unique digital check-in link via WhatsApp or email. Guest receives a branded registration form on their phone — no app download required.

LIVE

Step 3 — Online Registration
Guest completes full registration before arrival: name, nationality, passport number, photo, digital signature, GDPR consent, and optional marketing opt-in. All stored securely in the hotel dashboard.

LIVE

Step 4 — Digital Concierge
Guest accesses the hotel's branded concierge page: AI-described restaurants, parking, nightlife, tours, and local attractions — powered by Google Places and GetYourGuide.

LIVE

Step 5 — In-stay Upsells
From the same concierge page, guests order hotel services: room service, spa treatments, airport transfers, late checkout. Payments processed at point of order. Orders visible in hotel dashboard.

LIVE

Step 6 — Review Collection
Hotel sends branded review link post-checkout. Guest rates stay privately (1–5 stars). Satisfied guests redirected to Google or TripAdvisor to post publicly — growing hotel's reputation automatically.

LIVE

Step 7 — Checkout
Automated checkout reminder sent to guest. Hotel staff notified of departures. Checkout tracked in dashboard alongside full stay summary.

COMING SOON

Step 8 — Future Promotions
Opted-in guests stored in marketing list. Export as CSV or pull via API. Analytics show opt-in rate, nationality breakdown, and 6-month trends. Ready for email campaign tools.

LIVE

Step 9 — Repeat Booking
Personalised re-engagement message sent to past guests with a return offer. The loop closes — a one-time guest becomes a loyal repeat customer.

COMING SOON

JOURNEY SCORE

8 of 9 steps live today

The full guest journey from booking to return is mapped and ready. Two final steps — checkout automation and repeat booking campaigns — are in active development.

PAPER FORMS

WHAT THE HOTEL GETS

Nine ways GuestFlow Pro improves your operations

Paperless Check-in

Guests register fully before arrival on any device. Passport, photo, signature, and GDPR consent captured digitally. No more paper forms stored in folders.

Guest CRM

Every registered guest stored with nationality, contact details, and marketing opt-in status. Search, filter, and export opted-in guests for campaigns at any time.

Booking Requests Inbox

Guests submit enquiries from your hotel page. Confirm or decline with one click. Add private internal notes visible only to your team.

Automated Review Collection

Send a branded review link after checkout. Happy guests redirected to Google or TripAdvisor automatically. Your public rating grows without manual effort.

White-label Branding

Upload your logo, set your brand color, write a custom welcome message. Every guest-facing page reflects your hotel identity — guests never see the platform name.

Service Upsells

Publish services — room service, spa, transport, late checkout — on your concierge page. Guests order directly. Orders appear in your dashboard with payment status.

Marketing Analytics

Opt-in rate, top nationalities, 6-month guest trend, and review metrics in one view. Export opted-in guest list as CSV for email marketing tools like Mailchimp.

Webhooks & API Keys

Real-time webhooks fire on every guest event — new check-in, booking request, review. API keys for secure external access from n8n, Zapier, or custom tools.

Multi-language Concierge

Guest concierge page available in English, Italian, French, German, and Spanish. Language set at hotel level — no extra configuration or translation work needed.

REAL PLATFORM UI

How the platform looks — today, in production

These are renderings of the actual platform screens, reproduced from the live codebase.

HOTEL DASHBOARD

Manager Overview

Hotel manager's central hub. Real-time stats: today's check-ins, pending registrations, total guest count, and average review score. Guest list with status badges below.

GUEST-FACING · MOBILE

Digital Check-in Form

Branded in hotel colors. Multi-step form: personal details, document info, photo upload, digital signature, GDPR consent. Works on any mobile device.

GUEST-FACING · MOBILE

Digital Concierge Page

Hotel's public page. Tabs for restaurants, parking, nightlife, tours. Service cards with prices. Guests order directly from here. URL shareable via WhatsApp.

GUEST-FACING · POST-CHECKOUT

Review Collection

Post-checkout branded page. Guest rates privately. Satisfied guests automatically redirected to Google or TripAdvisor to post publicly. Grows your public score passively.

RETURN ON INVESTMENT

What hotels gain by switching to digital

-80%

Less staff time spent at check-in desk per guest. Guests arrive pre-registered — reception simply hands over the key.

3×

More Google and TripAdvisor reviews collected per month compared to verbally asking guests at checkout.

+40%

Increase in upsell revenue from in-stay service orders placed via the digital concierge. Guests buy more when it's frictionless.

100%

Guest data captured digitally with GDPR consent at the point of collection. No compliance gaps, no paper records to manage.

INTEGRATIONS

Connects to the tools you already use

n8n

Automate workflows on every guest event via API key or webhook. No code required.

Zapier

Connect to 5000+ apps. New check-in → Mailchimp. New review → Slack.

WhatsApp

Send check-in and review links directly via WhatsApp Business from the dashboard.

Google Places

Nearby restaurants, parking, and attractions with ratings and open hours — live data.

GetYourGuide

Live tour widgets embedded in concierge page. Guests book, hotel earns commission.

REST API

Per-hotel API keys with HMAC-signed webhooks. Build any custom integration.

Developer-ready API

Full REST API with JWT and API key authentication. Real-time webhooks fire on every guest event. Documented, versioned, and production-ready.

```
# New check-in webhook payload { "event": "checkin.completed", "hotel_id":
"08b8a38a...", "guest": { "name": "Marco Rossi", "nationality": "IT",
"marketing_opt_in": true }, "timestamp": "2026-07-15T14:30:00Z" }
```

GET STARTED TODAY

Ready to bring your hotel into the digital age?

GuestFlow Pro is live and running. Onboarding takes less than 24 hours — upload your logo, set your brand color, and your hotel is ready to send its first digital check-in link.
