SETUP TIME

Hotels still run on ~~paper forms~~ and hope for the best.

The hotel industry is one of the last sectors still relying on physical registration cards, manual review chasing, and disconnected marketing lists.

Paper registration cards

Stored in folders, illegible, impossible to search or export for GDPR compliance.

No systematic review collection

Staff verbally asking guests to leave a review at checkout — conversion under 5%.

Reception as the concierge

Staff fielding the same restaurant and parking questions 20 times a day.

Zero marketing data

No guest marketing list, no nationality analytics, no upsell visibility.

— THE SOLUTION

One platform that handles the complete guest journey.

GuestFlow Pro replaces every paper form, phone call, and manual follow-up with a branded digital experience — from first enquiry to repeat booking.

 Digital Check-in

 Service Upsells

From booking to repeat guest — every step covered

Before Arrival

Guest submits booking enquiry, hotel confirms, check-in link sent via WhatsApp or email. Guest registers fully before arriving — no queues at reception.

During Stay

Guest accesses digital concierge for restaurants, tours, and parking. Orders hotel services directly. All activity tracked in the manager dashboard.

After Checkout

Review link sent automatically. Happy guests redirected to Google or TripAdvisor. Opted-in guests added to marketing list for future campaigns.

Hotel Manager Dashboard

One view for everything. Real-time check-in stats, guest CRM, booking requests, and review scores — all in a single sidebar-driven dashboard.

- Live tiles: today's arrivals, pending registrations, total guests, average rating
- Guest list with nationality, room number, document status, and marketing opt-in
- Booking requests inbox — confirm or decline with one click
- Marketing analytics: opt-in rate, top nationalities, 6-month trend

The screenshot shows a mobile web browser interface for the 'Kashaf Hotel' in Florence, Italy. The browser's address bar displays 'guestflowpro.com/checkin/a3f9b2...'. The hotel's name and location are prominently displayed at the top. Below this, a progress bar indicates the current step. The main form area is titled 'STEP 2 OF 4 — PERSONAL DETAILS' and contains four input fields: 'FIRST NAME', 'LAST NAME', 'NATIONALITY', and 'PASSPORT / DOCUMENT NO.'. A blue 'Continue →' button is positioned at the bottom of the form.

Digital Check-in Form

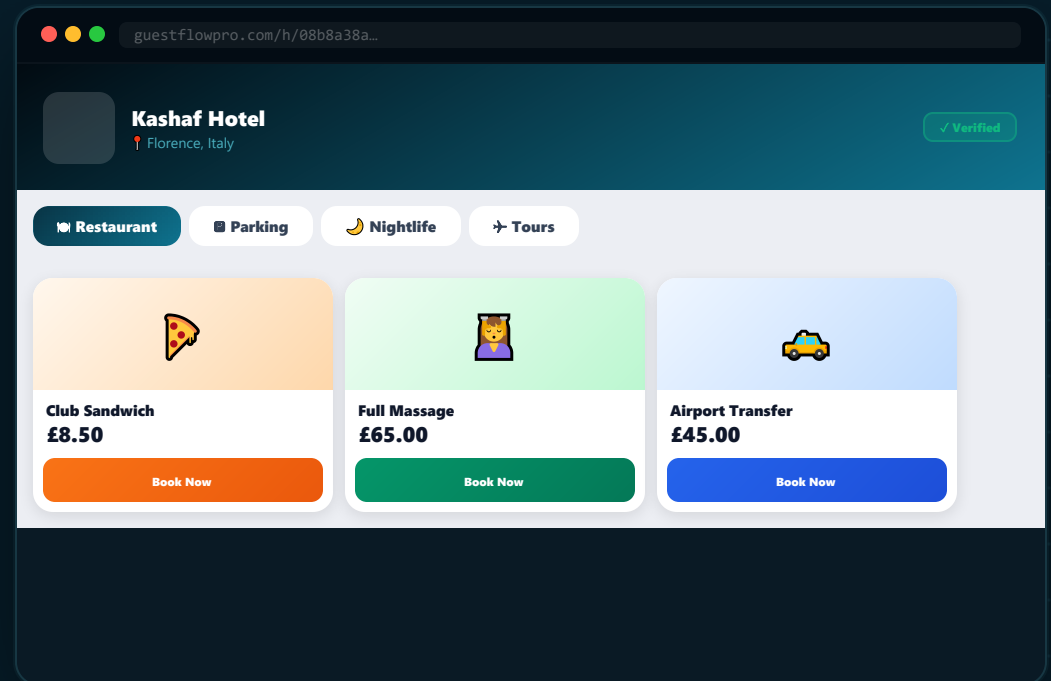

Guests register fully before arriving — on their phone, via a unique branded link sent by WhatsApp or email. No app download, no queue at reception.

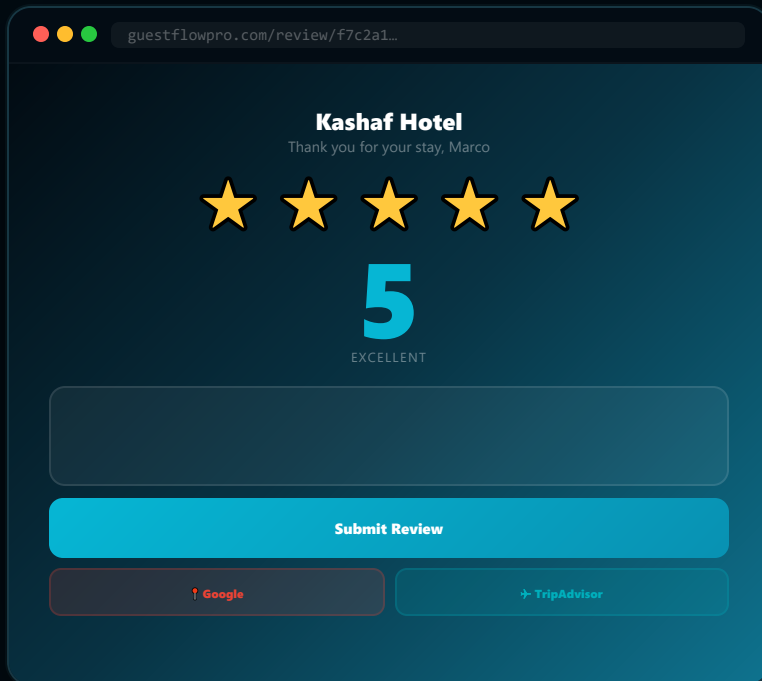

- Personal details, nationality, passport number and photo
- Digital signature and GDPR consent captured in one flow
- Marketing opt-in checkbox — builds your campaign list automatically
- Fully branded: your hotel logo, name, and brand color
- Works on any mobile — iOS, Android, any browser

Digital Concierge Page

Your hotel's public page is a full city guide — AI-described restaurants, parking, nightlife, and tours. Plus your own hotel services, orderable directly in-app.

- Nearby restaurants with Google ratings, open hours, AI descriptions
- Parking, nightlife, and attraction tabs — real-time Google Places data
- GetYourGuide tour widgets — guests book, you earn affiliate commission
- Hotel services (room service, spa, transport) with in-app ordering
- WhatsApp contact button — one tap to reach reception

Review Collection

After checkout, a branded review link is sent to the guest. They rate their stay privately — then satisfied guests are automatically redirected to post on Google or TripAdvisor.

- 5-star animated rating interface on a fully branded page
- Private comment captured before any public redirect
- Happy guests (4–5 stars) auto-redirected to Google or TripAdvisor
- All reviews visible in the dashboard with date and score
- Average score tracked over time with monthly trend chart

9 ways GuestFlow Pro transforms your operations

Paperless Check-in

Full registration on the guest's phone before arrival. Passport, signature, GDPR — all digital, all searchable.

Guest CRM

Every guest stored with nationality, contact, and marketing opt-in. Search, filter, export at any time.

Booking Requests

Public enquiry form → confirm or decline dashboard. Private notes visible only to your team.

Review Collection

Automated post-checkout review links. Happy guests redirected to Google or TripAdvisor automatically.

White-label Branding

Your logo, your brand color, your welcome message. Guests see your hotel — not our platform.

Service Upsells

Room service, spa, transport orderable in-app. Orders come to your dashboard with payment status.

Marketing Analytics

Opt-in rate, nationality breakdown, 6-month trend. Export opted-in guest list as CSV for campaigns.

Webhooks & API Keys

Real-time event webhooks. API keys for n8n and Zapier. Build any integration in any language.

Multi-language

Guest pages in English, Italian, French, German, Spanish. Language set once per hotel — no extra work.

What hotels gain by switching to digital

–80%

Less staff time at check-in desk per guest. Guests arrive pre-registered.

3×

More Google and TripAdvisor reviews collected per month vs. verbal asking.

+40%

Increase in upsell revenue from in-stay service orders via the concierge.

100%

Guest data captured digitally with GDPR consent from day one. Zero paper.

Setup in under 24 hours. Upload your logo, set your brand color — your hotel is ready to send its first digital check-in link the same day you sign up. No technical team required.

24h Onboarding

Full Support

Connects to the tools you already use

n8n

Automate workflows on every guest event via API key or webhook. No code required.

Zapier

Connect to 5000+ apps. New check-in → Mailchimp. New review → Slack notification.

WhatsApp

Send check-in and review links directly via WhatsApp Business from the dashboard.

Google Places

Nearby restaurants, parking, and attractions with live ratings and open hours.

GetYourGuide

Live tour widgets in the concierge page. Guests book, hotel earns affiliate commission.

REST API

Per-hotel API keys with HMAC-signed webhooks. Build any custom integration.

Developer-ready from day one

Full REST API with JWT and API key auth. Real-time webhooks fire on every guest event — check-in completed, booking confirmed, review submitted. Documented, versioned, production-ready.

```
# Webhook — new check-in { "event": "checkin.completed", "hotel_id": "08b8a38a...",
"guest": { "name": "Marco Rossi", "nationality": "IT", "marketing_opt_in": true } }
```

Ready to bring your hotel into the digital age?

GuestFlow Pro is live and running. Onboarding takes less than 24 hours — your hotel's first digital check-in link goes out the same day.
